

**CLEAN AIR
SYSTEM**

BEAUMONT, Texas - David M. Caldwell DDS is proud to announce the installation of Big Ass Fans (BAF) Clean Air System UVGI technology to ensure a safer, healthier space for staff and patients alike.

Proven to significantly and safely reduce aerosolized SARS-CoV-2 from the air and mitigate infection risk, BAF's independently tested system delivers better air quality to occupied spaces with a focus on air disinfection and deactivation of pathogens, viruses, bacteria, and other harmful particulates.

At David M. Caldwell DDS we're actively, and aggressively, creating a better environment starting now; an environment that not only addresses our current global pandemic, but also brings long-term solutions recommended by both the CDC and ASHRAE to our spaces.

We welcome you back to David M. Caldwell DDS with peace of mind and we look forward to providing the safest, cleanest, healthiest, most comfortable dentistry for years to come.

About Big Ass Fans:

Starting in 1999, Big Ass Fans pioneered the high-volume, low-speed (HVLS) fan industry by introducing large industrial fans to agricultural spaces. Recognizing the fans' versatility, our customers began to install them in warehouses, factories, commercial spaces, and homes. With each new application, our engineers set out to design the perfect solution to meet our customers' needs. Our dedication to innovation has led us to develop the industry's first silent motor technology, smart fan controls and automation, and air disinfection technologies. For more information about Big Ass Fans, visit bigassfans.com, cleanairsystem.com, or call 877-BIG-FANS.
